APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 61160 which changed the point of diversion of water heretofore appropriated under claim of vested right as evidenced by Proof of Appropriation of Water 04689, is issued with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. The State reserves the right to regulate the use of the water under this proposed change at any and all times. This permit is issued subject to any determination of the waters of an underground source that may be made under adjudication proceedings under NRS. 533.090 through 533.320.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined duty of water under Permits 64100 and 64101 shall not exceed 75.0 acre-feet, and is limited to the irrigation of 18.75 acre-feet within the described place of use.

This permit is issued supplemental to Truckee River Claims 76 and 76a.

(CONTINUED ON PAGE 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.4374 cubic feet per second, but not to exceed 70.0 acre-feet annually, and not to exceed a yearly duty of 4.0 acre-feet per acre of land irrigated from any and/or all sources.

Work must be prosecuted with reasonable diligence and be completed on or before:

March 9, 2001

Proof of completion of work shall be filed before:

April 9, 2001

Application of water to beneficial use shall be filed on or before:

March 9, 2004

Proof of the application of water to beneficial use shall be filed on or before:

April 9, 2004

Map in support of proof of beneficial use shall be filed on or before:

April 9, 2004
